When purchasing a French dictionary, you must take into account language skills and what you will use the dictionary for. It is also important to bear in mind that bilingual dictionaries are an excellent tool, but they can have inconsistencies both larger and smaller. Their main weakness is offering words that are no longer used. The following French-English/English-French dictionaries are arranged according to the quantity and quality of entries. It is the largest and best French-English English-French dictionary, with over 2,000 pages. Entries include slang, regionalism and expressions. There's also a useful language in use section with vocabulary and terms grouped by category, such as suggestions, tips, business correspondence, and more. I believe that this is the only option for fluent speakers and translators. Abbreviated version of the 1,100-page dictionary above. Suitable for advanced students. Paperback dictionary with 100,000 entries including slang, culture and more. Intermediate students will find that this dictionary has everything they need. Nice basic bilingual dictionary. Beginners and travellers can get away with this, but if they use it regularly, they will soon learn about the limitations of this dictionary - it's big enough just for the essentials. Dmitry Elagin/Shutterstock Dictionary is probably your go-to source for fact-checking and spelling. But these small (or better, great!) books have a surprising history of non-points. There's something else the dictionary has to focus on: missing words. Take, for example, the first edition of the Oxford English Dictionary (OED). The composition of the OED was a chaotic and disorganised process, and staff catalogued and identified all 414,825 words for almost 70 years. As a result, many of the terms were misaged in the shuffle. It is a miracle that only one word has managed to slip completely through the cracks: bondmaid, which means slave girl. If you have not heard of this, we do not blame you; this word is not often used today. The term was most popular in the 16th century, which went back to the translation of the Bible from 1526. But when the first year of the Oxford English Dictionary was published in 1888, this ancient word was mistakenly left out. Take a look at these almost extinct words that you should use right away. It is rumoured that OED editor James Murray, when he found out about the mistake, was reusing his embarrassment. The phenomenon is completely inexplicable and with our minute organization I would say absolutely impossible; I hope it's also absolutely unprecedented, he wrote to an anonymous rant. It took nearly five decades to correct the mistake, reports Mental Floss. Fortunately, the lost word debuted in the dictionary in 1933, when the second has been published. At the opposite end of the spectrum, there are nine false words that ended up in the dictionary by accident. Although the Oxford English dictionary has continued to expand since 1888, thankfully it has not forgotten to include a word from this unfortunate accident. However, dictionaries still cannot solve all our literary problems – these are the 20 most confusing grammatical rules in English. [Source: Mental Floss] One of the least used tools to learn English is the use of a co-dictionary. Co-rotation can be defined as words that go together. In other words, some words are tinged in other words. If you think for a moment how you use your language, you'll quickly recognize that you speak in phrases or groups of words that go together in your mind. We speak in pieces of language. For example, I get tired of waiting for a bus this afternoon. The English speaker doesn't think of ten separate words, but in phrases I get tired of waiting for a bus and this afternoon. That's why sometimes you can say something right in English, but that doesn't sound right. For example, I get tired of standing behind a bus this afternoon. Someone who imagines the situation behind a bus makes sense, but standing up goes along with the queue. So while the sentence makes sense, it's not really correct. As students improve Their English, they learn more phrases and an idiomatic language. It is also important to learn the co-rotation. I'd say it's the most ruthless tool of most students. Thesaurus is very useful to find the same name and antonime, but the collocation dictionary can help you to learn the right sentences in context. I recommend the Oxford Collocations Dictionary for English students, but there are also other collocation resources available, such as the concordance database. Try these tutorials, use the collocation dictionary to improve the vocabulary. Choose the profession you're interested in. Go to the Professional Outlook website and read the details of the profession. Consider common terms that are used. Next, look for these terms in the co-location dictionary to expand your vocabulary by learning the appropriate co-location. Example Airplane and avionik Keywords from professional outlook: equipment, maintenance, etc. From the co-dictionary: Adjections of equipment: latest, modern, most in-use, high-use, etc. Types of equipment: medical equipment, radar equipment, telecommunications equipment, etc. Verb + Equipment: provision of equipment, supply equipment, installation equipment, etc. Sentences: real equipment, real equipment From the collocaic dictionary: Maintenance adjectitions: annual, daily, regular, long-term, preventive, etc. Types of maintenance: maintenance of buildings, maintenance of software, medical maintenance, etc. Verb + Maintenance: carry out maintenance, carry out maintenance, etc. Maintenance + lye: maintenance staff, maintenance costs, etc. Choose an important term that you can use daily at work, school, or home. Find a word in the co-dictionary. Then imagine a related situation and write a paragraph or more using important collocations to describe it. The paragraph will repeat the keyword too often, but it is an exercise. By reusing the key term, you'll create a link to a wide range of co-locations with the target word in your mind. Example key term: Business situation: Contract negotiations Example paragraph We are working on a business arrangement with an investment firm that conducts business with profitable companies around the world. We set up the business two years ago, but we were very successful because of our business strategy. The CEO has outstanding business plans, so we look forward to doing business with them. The company's business headquarters is located in Dallas, Texas. They've been in business for over 50 years, so we expect their business experience to be the best in the world. Make a list of important co-rotations. Please notice that use at least three co-locations in conversations every day. Try it, it's harder than you think, but it really helps meeting new words. 8Filipino is the official language of the Philippines along with English.
